App To Split Screen On Mac

0-WEB.ru

Split View requires OS X El Capitan or later, and the steps differ slightly based on which macOS you're using.

If these steps don't work, choose Apple menu \mathbb{Z} > System Preferences, click Mission Control, and make sure that "Displays have separate Spaces" is selected.. Several Mac users have reported that the Mail app window just pops up randomly and for no reason.. This is an annoying problem because it will interrupt what you are doing. Are you also having this problem on your Mac? This short article explains how you can stop the Mail app from keep launching itself automatically while using the computer.
